## Explore products

The product section is accessible via the menu and the widget on the homepage. It shows the products as thumbnails. You can explore the products or search for a specific product in these sections.

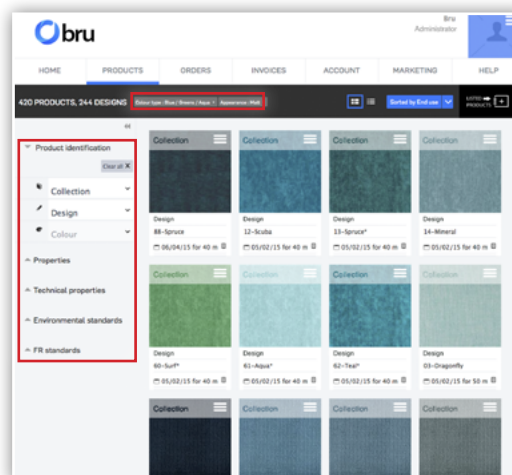

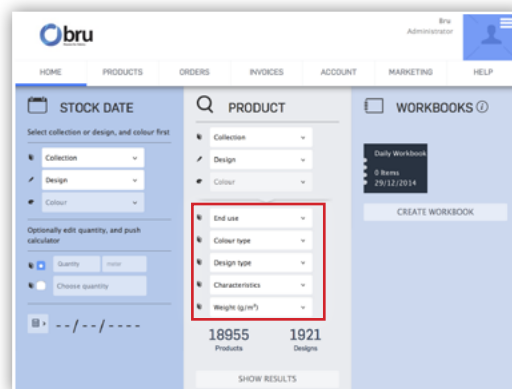

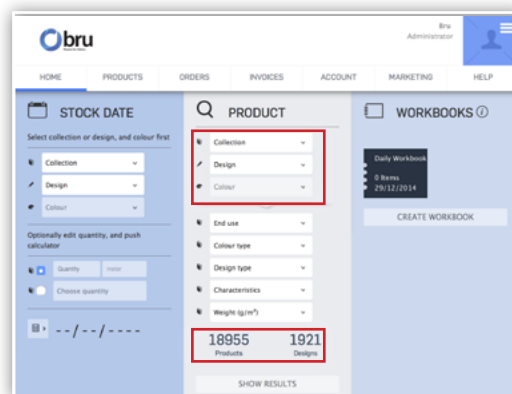

### The product widget

To find a product using the widget on your home page you have two options.

#### Step Instruction

- 1 In case you know the name, specify your product by selecting collection and a design name in the drop-down menu of the widget.
- 2 After this you will need to pick a colour, now you have identified a unique product. The amount of available designs and colours are updated below.
- 3 In case you don't know the specific name of the products you are looking for, you can filter all available products by selecting one or more options.
- 4 For example the first option *end use*, here you can select the usage of your product. Drapery, multi-purpose, upholstery or wall covering. Multi-purpose is fabric suitable for both drapery and upholstery.
- 5 Click on show results to find your product overview of the available products in thumbnail view. In the left bar and the bar on top you can find the specifications of your chosen products.

## The product page

In the menu you will find the product section, you will find the product section. By clicking, you arrive at the same page as before, the product section but without any filtering.

### Step Instruction

- 1 In the menu on the left you can identify the product by the name of the collection, design and colour if you know which product you are looking for. Just like anywhere in the platform.

### Image

- 2 If you do not know the name of the product, open the drop down menu of the properties on the left. Here you have even more categories than on the widget to specify your product.
- 3 In the other three drop down menus you can find more technical criteria, environmental, or fire retardant standards. You can fully explore our products and get to the desired results in no time.
